GÉNESIS ACROBATIC SHOW

STRUCTURE & FEATURED ACTS

The show is a succession of high-impact moments designed to maintain tension and wonder:

- **The Glass Box (Extreme Contortion):** The flagship act. A demonstration of superhuman flexibility where the artist fits inside a small glass box. A hypnotic moment that combines technique and suspense.
- **LED Hula-Hoop Symphony:** An explosion of color and movement. The use of LED technology in the hula-hoops creates light trails that draw geometric figures in the air, perfect for night shows or stage performances.
- **Balance & Handstand Artistry:** Static hand-balancing that requires absolute strength and control. The elegance of movement unites with physical difficulty in a meticulously timed choreography.
- **Candlelight Contortion (Mystique of Light):** An evocative act where flexibility blends with candlelight, creating an intimate and elegant atmosphere ideal for exclusive galas.
